Q7.5 - If there anything else you would like to tell us about how you access and use the internet and digital devices, please enter it here. Please do not provide any personal information such as health conditions, address, or phone number.

If there is anything else you would like to tell us about how you access an...

Being in a fixed income makes it very tight to afford internet and cell phones

We would like to see faster and more reliable internet services...with less connectivity issues.

The DSL goes in and out ! Constantly my reboot modem , constantly receive messages Att is unavailable .when storm comes its worse

Built custom system with 4g antenna, 4g modem (netgear 1100), mesh routers. Paid thru 3rd party for unlimited data plan with AT&T at \$80/month. Frequently have to reset the device due to AT&T throttling data speeds. Advertised as unlimited data plans but have been disconnected if usage was over 600 GB per month. Aside from Starlink, advertised services like Frontier (5 Mbps) and TMobile (not available) are inadequate for basic internet service

We have no access to decent internet. We get 1mgb through brightspeed. Verizon doesn't pick up here. No spectrum. We have nothing.

Hughes Net is very disappointing. WiFi is very bad.

We use Starlink. It was expensive to purchase/get installed and is expensive each month. Connectivity is good.

We use satellite for internet access. This is both expensive and suffers from high latency with no options for port forwarding.

No

I take issue with the government paying for some individual's internet and others have to pay whatever the Spectrum charges.

None

we use a mobile phone to access the internet sometimes. laptop and home desktop.

Our internet can be inconsistent and terribly slow.

If there is anything else you would like to tell us about how you access an...

I am work in IT, my children use the internet for school. Devices we are fine on, but broadband in Granville County is abysmal

Service is usually very slow during peak hours.

We need speedy service since we work from home.

There is sometimes spotty service where we live, except for certain locations inside the house, especially when using phone or laptops. We understand that it is not the internet provider but that service in this part of our county is not what it should be, compared to more populated areas. Our county government uses the term "underserved," which says a lot for our area.

We supplement brightspeed with starlink as brightspeed can't keep up with our device demands.

We do not have high speed internet in our area. It is available a mile down the road but they will not come any further to put it in.

With DSL and us at the very end of a line it is not adequate and occasionally drops our both phone and internet leaving us unable to reach the outside world in an emergency.

We only have 2 options here for Internet. 3-30Mb phone based DSL, and starlink, which is ~100Mb but expensive.

I regularly see posts on Nextdoor about slow or poor internet in 27525

We cannot get fast enough internet where we live. We can barely use one or two devices while watching TV.

I don't mind using the cell service as internet provider; we need more towers and stronger signals in the northern area next to the VA boarder.

Home WiFi was so bad that elementary school granddaughter couldn't access the internet for school. Same with me for work, school, & religion.

I have HughesNet but it is spotty. They say trees across the road block satellite. I also pay for satellite, mobile and cable and I am on a fixed income and could use some relief

There are many times we can't connect to the internet and we don't have reliable cell service as well so that is not an option

If there is anything else you would like to tell us about how you access an...

When I signed on to T-Mobile I was told it would be \$25 for life and unlimited. NOT so, bait and switch. It is now much higher and I don't get unlimited as it isn't available here, even though the T-Mobile guy said he checked and it was. Goes out with storms.

Fiber Internet is wanted in this area but not available. Internet connection here relies on coaxial cable and there's little to no competition only spectrum.

Satellite Internet (hughes.net) Not very reliable. Always dropping out & non existent on cloudy or foggy weather

We have wifi, but we are limited.

Have to use a satellite service, as nothing else available at our location. Fiber would be great

Most of the time I access internet at work. In the evening I use my phone/mifi. It's better than satellite but not adequate enough for my needs. ATT promised us 15 years ago that they would bring internet out our way in a year or so and never bothered. We have submitted petitions, etc... When they refused, I promptly dropped my landline. Less than a mile away, the houses have high speed internet. It's frustrating.

In rural Granville county, outside of city limits, there no broadband internet options, only satellite internet. Not only is satellite internet expensive, it is not as reliable as broadband connection.

No service is available here. Just an iPhone.

Often need to stream information for work. Buffers alot

Internet access is terrible and way too expensive for what you get

Our internet is horrible

Our internet service is very slow and unreliable. Particularly for the \$\$ we pay monthly. In this area Starlink is our only other option

Please bring faster and affordable services, spectrum has been really bad and we don't have any other sources

I use the internet to do my full time job as well as run my small business - reliable internet access is critical to my livelihood and my paid service is spotty at best. Multiple times a week I drive to Durham to access reliable internet when I have urgent work needs.

If there is anything else you would like to tell us about how you access an...

I have internet but it is very slow. Hopefully they can update equipment and will be better.

I have a fairly reliable internet service, however, I teach many students who live in the more rural parts of the county who have spotty or no internet service at all. This makes teaching in 2023 very difficult as it puts our children at a huge disadvantage compared to those in more urban areas or in other countries.

no

The internet speed in Warren County is not good at all.

Internet is slow. Not enough to do work, schoolwork, stream. Other parts of county have been put on higher priority getting better internet when they already have it.

Must use wi-if to get signal at home on phones/tablets. poor connectivity when walking in neighborhood

Bill pay, medical info, work from home. Grandson's home work

We need more extensive internet access in the rural parts of the county.

I would like to help rural communities to have faster and accessible means to the internet and digital devices.

The cellphone signal in our area is horrible. The only way to use our cellphones is through our wifi. If our wifi goes out, we have to wonder around the yard in order to find a good signal. Also, the internet service that we have is not very dependable. Sometimes it works and sometimes it is so slow that streaming is out of the question. Definitely not the best in the world.

Older citizens, access very important for health, safety and social connections

We have Starlink. It os very expensive but the best service option

Spectrum is too high

Internet services need to be more available and more affordable

We have service but not very good because of the area we're in, service is spotty

If there is anything else you would like to tell us about how you access an...

The internet is my valuable resource to get information on a variety of things. It is also a tool to communicate without disturbing others.

Craft Ideas, you tube

Oxford needs senior classes and repair store

Craft ideas, you tube

Oxford needs senior classes and repair store.

Craft Ideas, You tube

Oxford needs senior classes and repair store.

Have taught myself everything I know about technology. The updates are moving faster than I can keep up anymore. Gets frustrating.

My internet is with Brightspeed, It's buffers a lot I stay with them, because the others are too expensive! Spectrum, Hughes,

starlink satellite is affected by weather. need fiber connection

Current speed at 8 Mbps and cannot use multiple devices. Not enough bandwidth to work from home.

We experience slow internet issues with frequent interruptions in the connections.

currently using Hughes at location and it's not very good.

No.

Low upload speed requiring any items that need to be emailed or submitted to have to be taken to another location with higher upload speeds.

We use them a lot to watch movies, videos, and play online only games on a Xbox Series X, which has trouble due to lag.

If there is anything else you would like to tell us about how you access an...

We use data capped internet through hotspots because it's the only viable option. Completely hinders our business for long enough.

My internet with brightspeed is slow and spotty. Custom service is bad. I would love to have broadband where I live

The consistency of the internet speed is not good. Occasional outages occur. I work remotely a portion of the week and wish my upload speeds were faster.

Only access is through Brightspeed and speeds are very slow despite monthly costs similar to what I paid at prior residence with Spectrum. Any help with improving broadband access would be appreciated.

DSL and its slow. Cellular Data does not work at my home

My devices was a gift

No

No it's not

We do not have cellular service in our area. We also do not have high speed internet because it is not available at our address.

Low prices

I use it for information to find a address or family. etc

none

use friends internet

no

Sometimes the language is hard to understand

no

If there is anything else you would like to tell us about how you access an...

Starlink is the bomb!

Solo el servicio de Spectrum es quien nos brinda el servicio y no es muy bueno.

Access the internet through Frontier. It is spotty service, at times very slow and disconnects frequently. Hard to conduct zoom meetings from the house.

I use HughesNet which is not very good esp in bad weather. Cannot get high speed internet, cannot stream, satellite is my only option for home service.

Absent internet access, we couldn't live our current lifestyle.

Internet is slow

Our internet connections are a joke. We have DSL from Brightspeed -- and it is little better than dial up. We get continued promises of improvement but nothing has improved in years -- and it goes out every morning like clockwork and may be out three to four hours. Their service tech just shrugs and goes on to the next customer. They are ripping off the government and customers alike!

I have two sources of internet at home and both suck. I have CenturyLink and StarLink.

Cell phone service is spotty, can't use my cell phone in all areas of my home. Internet is via DSL.

Due to lack of population density, higher speed internet is not available, at an affordable rate. Company wants you to bundle other services which drives the price up.

Poor service buffering 50percent of time

Internet is getting more reliable, but it is still pretty slow.

No

Slow speed, only use internet, cell phone. No streaming, etc.

I use the internet services at doctor's offices and other public places.

If there is anything else you would like to tell us about how you access an...

A lot of lagging. A lot of slow downloading. A lot of waiting for responses via emails.

The internet is not always working or reliable.

no

I'm using a DSL, NOT high-speed Internet, and it is often inadequate for my needs.

work

needs to be fast

not all my responses lit up or showed a check mark. Not sure the survey was complete. Not having high speed has kept me from working from home and taking on line courses. High speed would make a huge difference in our lives. Thanks for caring.

no

No

High speed Internet access!!! And no monopolies. We only have Spectrum as an option. We have Verizon for cell phones but not high speed access.

Use Kindle for Reading; Desktop Computer for E-Mails, Etc.

na

Our internet provider advertises much faster speeds than we are actually offered. I think prices should have gone down without all this bundling.

The lack of internet access prevents me from working from home and working at home. Additionally, it discourages my adult children from visiting me because they cannot work remotely or use the computer to play video games that require a faster internet speed.

To conduct business, pay bills, social media

If there is anything else you would like to tell us about how you access an...

Wifi in my home, car, and workplace is often spotty, slow, or not working at all.

Spectrum told me that I need to pay, \$6,000.00 dollar to them come down to my house to provide services.

I used satellite internet for years till hard wire came to my area. Satellite is outrageous expensive and you get terrible service.

The initiative to provide high speed access here to all is a good effort but will take a very long time

Our devices are fine, it's the CRAPPY INTERNET PROVIDER that's the problem. "Brightspeed" (a complete misnomer), formerly CenturyLink.

While my access to reliable internet service is good, many friends and family in other parts of county and areas of surrounding counties do not have the same options.

We need better coverage in rural areas and more choice between providers to drive down costs and increase quality.

I have no signal at my house so I am wifi dependant. When cable goes down I have no way of accessing the internet on my phone. Cable is Spectrum and phone plan is Verizon. Why can't we get a stronger signal??

Minimize use because services will slow down towards next billing cycle. Data runs out poor service where I live

In rural areas, speed is an issue. Limits streaming opportunities.

AARP does nothing for the disable

Our community has been told that our service is adequate, so we are unable to get fiber optics that are being installed all around us

The internet should be less expensive for older people living on a fixed income.

Don't get good service have to but internet service

There is NO cell phone service where I live.

Lack of internet costs LOTS of extra miles each month.

If there is anything else you would like to tell us about how you access an...

bandwidth is horrible - only brightspeed - claim 3 MBPS - deliver typically 1.5 MBPS often 0.3MBPS at peak times - we have no cell signal either so we are at high risk in case of emergency.

no

Compared to many others in Warren Co, I am fortunate. The dsl broadband service at my home meets most of my needs. Our neighborhood is still waiting for cable internet service and even if it comes it will not be fiberoptic. I am aware that many areas of Warren Co have poor to no service - both mobile and dsl internet. It's a serious problem especially since so many government, social and business services are internet based. You asked about internet privacy - some of that is out of my control. I just read this morning in the N&O that 4 major tax preparation companies have been transferring personal data of customers to Meta - that's unforgivable.

Our internet is very slow and we are only able to get about 2.5gb. If one or two people are using the internet, the rest can't access it

Can not get high speed internet. Only 1.5 mbs available despite living in a very populated area. Brightspeed refuses to upgrade to fiber despite getting federal grants.

While I use the internet daily and will continue to use Spectrum cable, there are limited options. Satellite internet is also costly and interrupted by severe weather (when internet access can be life-saving with alerts) and cell service is weak in this rural area. Spectrum requires packages that exceed my needs, increasing cost.

slow speed on service. Need more speed. Speed is only 7 mps.

Sometimes poor service.

No

internet is spotty where I live. I was only able to get 3mps max as a dedicated land internet and 50mps max which drops to 3mps after i used all my 100gig of data. Now I have unlimited starlink but it is \$150 a month for that. we are supposed to get faster internet here waiting to see what and how fast. We had fiber run at the end of the road but it was a dedicated line for new solar farm which was a bummer. not sure why they just didn't run fiber for everyone at the same time.

I have to use satellite internet, no other service available

Tv is not affordable

If there is anything else you would like to tell us about how you access an...

Relatively slow service with Brightspeed but price of 50.00 per month makes it acceptable for our current needs.

Spectrum internet very costly. Total wireless but so many dead spots. Not much WiFi in rural areas.

We have two modems located in our home with Brightspeed internet services. We cannot connect more than 1 device at a time. With a household of 6 with multiple students needing individual needs and two self employed business owners/operators we can't connect calls or internet viable to our needs. This effects our subdivision as well as the other 4 in the area and homes in the area. We've contacted chamber of commerce as well as providers for assistance, with no luck.

Our broadband service (Brightspeed) is SLOW ... 8Mbps download, 0.75Mbps upload (I live at Lake Gaston and service is even slower weekends and holidays when there are a lot of folks here)

Internet is slow and we only have one internet provider that we can use in our area and they are terrible. Internet is very spotty and the connection is poor. We do not have fiber optics in our area.

Use Starlink

While we have access to the internet our service is slow, through Brightspeed we have 10mbps as our top speed. We have frequent service interruptions.

I would like a better selection of internet providers in my area.

Nope just need better broadband

I would like to how to encourage free town-wide broadband in Warrenton, NC.

Work from home Home school Telehealth visits weekly

communication, signing in for appointments, messaging, email, Facebook

I purchased a refurbished Think Pad from the Kramden Institute. I paid 70.00.

CenturyLink is only landline internet available. But, technicians cannot get it to work here. Those who have CenturyLink say it is slow and hit or miss.

If there is anything else you would like to tell us about how you access an...

If one of my personal computing devices broke down right now, I am not sure that I would be able to replace it if we couldn't fix it, or if I could afford to pay someone to fix it. Our budget is so tight that those kinds of things are near impossibilities...

i use the internet in a home based business. the service is very slow and has degraded since centurylink sold to brightspeed. it is the only option available and again is very slow. i'm willing to upgrade but that is not an option.

I stumble in using these devices. Much more personal instruction, training and technical assistance needs to be available at the Library or at the Community College. It seems as though consumers are expected to learn each digital device by trial and error instead of formal courses being taught at the local library or community college.

Library - we use it to help patrons access info of all kinds, we use it to run our circulation software, and to help with our programs.

Our home internet speed is not good enough. It barely handles streaming TV and one person searching online. It cannot handle two people playing a frame-rate intensive video game, such as Overwatch.

The digital divide is real with so many services going on the internet with many not having sufficient access

Use basic service from bright-eyed only internet service available in this area. No other service besides satellite internet.

hvgchfh

Our community has slow/limited internet and cell signals. The fastest internet speed in our community is 6 mbps. Cell service has to connect through internet.

Q8.1 - What is your age? (Please enter only numbers)

Q8.2 - How many people currently live in your household, including yourself?

The first bar chart indicates the number of adults living in the household. The second bar chart indicates the number of minors (<18) living in the household.
